

# BRINGING THE MOVEMENT

PROJECT CHARLEY WAS FORMED TO FUND CUTTING-EDGE NEUROLOGICAL REHABILITATION EQUIPMENT IN AUSTIN, TEXAS FOR CHILDREN AND ADULTS IN NEED OF SPECIALIZED REHABILITATION.

## ABOUT

Charley is a nine year old, third grade student at Bridgepoint Elementary in Austin, Texas. In the summer of 2016, Charley, her father, and her siblings were in a serious car crash that left Charley unable to walk. Her recovery has been a series miracles, led by amazing doctors and therapists, loving parents, and army of supportive friends and family members. Through her tenacity and hard work, she has made outstanding progress. She works out at our partner facility, Spero Rehabilitation and continues to make amazing strides in her recovery.

In 2018, Charley's parents, Barney and Shannon Sinclair founded Project Charley, a non-profit dedicated to improving the lives of those with neurological injuries. Today, Project Charley is making a significant impact in our community and patients are making huge strides in their mobility and rehabilitation efforts through the equipment that we have procured with the donations from our generous supporters.

## EQUIPMENT

Through the generosity of our donors, we have purchased FIVE state-of-the-art pieces of equipment that have helped hundreds of patients through therapy sessions at Spero Rehabilitation. Our Lokomat and Trexo devices are the ONLY machines in Central Texas, and patients travel from all over the area to utilize them.

## SCHOLARSHIPS

We are proud to currently support three patients and are always looking for more recipients to award scholarships.

## CAMPAIGNS

We have successfully raised \$800,000+ for our initiatives through three campaigns: Lokomat, The Full Ride and the TREXO Campaign. But we're just getting started. Our current campaign, Trexo, is to fund a new device that helps to deliver gait training to children with mobility impairments.
